Software Testing

Test Management Plan, Reporting

by   J. Janvier (Jay/文宇)

Test Report

General sections (default in every project document)

- Purpose
  What is the purpose of the document? Why is the document written? For who is the document intended?

- Scope
  What is included and what is excluded?
  What information can you find in the document?
  And what information will be excluded from the document?

Test Report – Specific

A Test Report is the final presentation of the test results.

- It contains statement(s) about which Test Level(s) the report is related to.

- It contains statement(s) about the reached level of quality
- It contains statement(s)/analysis about the progress

Test Area	Total Tests	Pass	Fail	Not Executed	Total Executed	Executed & Pass
Setup	11	6	2	3	8	
		55%	18%	27%	73%	75%

Optional:

- It might contain information from the TMP (depending on the intended audience)
    Example: What was tested? How was it tested?

- It contains statement(s) about the how to proceed (if necessary)
    Example: Recommendation that Software Engineers should improve
        their understanding of the requirements
